this volume showcases the valuable achievements of the romanian technology and industry worldwide it started from the premise that the history of romanian technique is scarcely known outside the borders of romania the main romanian contributions to the world s technological heritage are missing except for a few names in the field of aviation from the great encyclopedias and dictionaries published worldwide this is due among other reasons to the insufficient promotion in widely spoken languages of the history of romanian technology the multidisciplinary approach of the volumes means that the field of technology had to be split into several branches the present volume includes the following industries electrical engineering energy technology

biomedicine maritime and rail transport automotive industry aviation the history of engineering societies of engineering education of intellectual property and of inventions as well as a synopsis of the personalities of romanian engineering have been tackled in separate chapters for each field are engaged the collaboration of authors who have already published a history of their field certain chapters were drafted with the aid of specialists who have played the part of policy makers in the elaboration of development strategies for romania and who are familiar not only with the facts and the history of their field but also with the philosophy behind its development

proceedings of the fisita 2012 world automotive congress are selected from nearly 2 000 papers submitted to the 34th fisita world automotive congress which is held by society of automotive engineers of china sae china and the international federation of automotive engineering societies fisita this proceedings focus on solutions for sustainable mobility in all areas of passenger car truck and bus transportation volume 3 future automotive powertrains i focuses on alternative fuel and new engine advanced hybrid electric vehicle plug in electric vehicle above all researchers professional engineers and graduates in fields of automotive engineering mechanical engineering and electronic engineering will benefit from this book sae china is a national academic organization composed of enterprises and professionals who focus on research design and education in the fields of automotive and related industries fisita is the umbrella organization for the national automotive societies in 37 countries around the world it was founded in paris in 1948 with the purpose of bringing engineers from around the world together in a spirit of cooperation to share ideas and advance the technological development of the automobile

this volume represents the 20th international conference on information technology new generations itng 2023 itng is an annual event focusing on state of the art technologies pertaining to digital information and communications the applications of advanced information technology to such domains as astronomy biology education geosciences security and health care are the among topics of relevance to itng visionary ideas theoretical and experimental results as well as prototypes designs and tools that help the information readily flow to the user are of special interest machine learning robotics high performance computing and innovative methods of computing are examples of related topics the conference features keynote speakers a best student award poster award service award a technical open panel and workshops exhibits from industry government and academia this publication is unique as it captures modern trends in it with a balance of theoretical and experimental work most other work focus either on theoretical or experimental but not both accordingly we do not know of any competitive literature
