no longer relegated to just the classroom learning has become universal through the
use of social media social media embodies constructivism itself as the users engage
in the development of their own meaning and constructivism is relevant to education
and learning theory and technological advance can be better understood in the light
of one another this volume explores particular areas influenced by constructivist
thinking and social media such as student learning faculty development and
pedagogical practices practical and useful ways to engage in social media and
dialogue and discussions regarding the nature of learning in relation to the technology
that has changed how both faculty and students experience their educational
landscape this is the 144th volume of this jossey bass higher education series it offers a
comprehensive range of ideas and techniques for improving college teaching based
on the experience of seasoned instructors and the latest findings of educational and
psychological researchers

2012 marked the centenary of one of the most significant discoveries of the early
twentieth century the discovery of x ray diffraction march 1912 by laue friedrich and
knipping and of bragg s law november 1912 the discovery of x ray diffraction confirmed
the wave nature of x rays and the space lattice hypothesis it had two major

consequences the analysis of the structure of atoms and the determination of the atomic structure of materials this had a momentous impact in chemistry physics mineralogy material science and biology this book relates the discovery itself the early days of x ray crystallography and the way the news of the discovery spread round the world it explains how the first crystal structures were determined and recounts which were the early applications of x ray crystallography it also tells how the concept of space lattice has developed since ancient times and how our understanding of the nature of light has changed over time the contributions of the main actors of the story prior to the discovery at the time of the discovery and immediately afterwards are described through their writings and are put into the context of the time accompanied by brief biographical details

this text provides an up to date overview of crystallographic instrumentation and methods of diffraction measurements used for crystal and molecular structure determination the book provides a unique description of both principles and specific instruments and methods for data collection adjustment of instruments and primary data processing and error correction

features review articles covering key areas of research and progress this journal provides comprehensive and expert critical analysis in organic inorganic physical analytical theoretical and biological chemistry
